

The Industry's Most Complete Payment Issuance Solution

Create integrated, seamless physical and digital payment experiences for your customers with the Entrust Instant Financial Issuance Digital Card Solution

ENTRUST

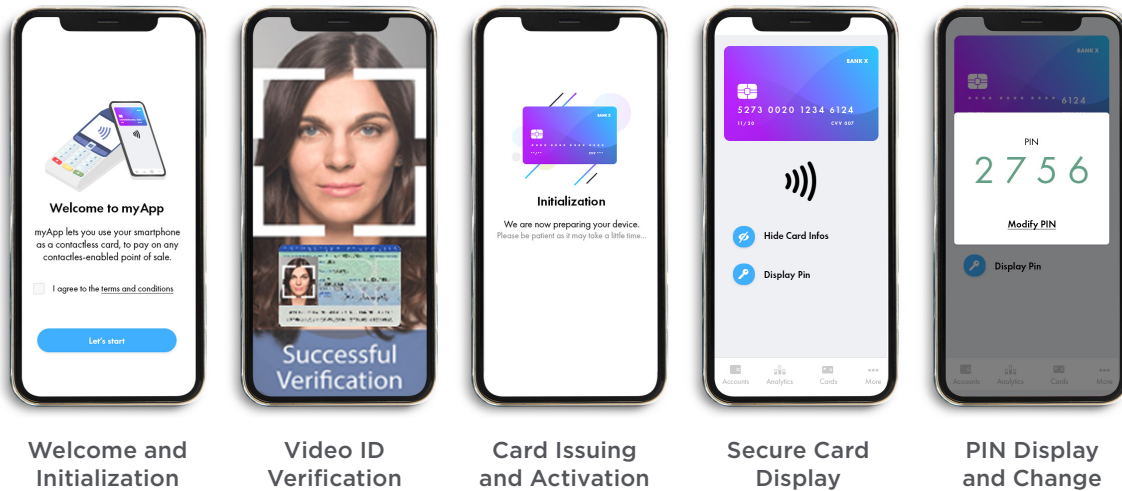

SECURING A WORLD IN MOTION

Entrust Digital Card Solution

- NFC Issuer Wallet
- X-Pays & Merchants Push
- Token Manager
- Card Display
- PIN Display/Change
- Strong Customer Authentication
- Card Alerts

All digital card features in one single solution

One software development kit for all digital card services

NFC Issuer Wallet

Turn your mobile banking app into an NFC wallet to give your customers the ability to make mobile NFC payments.

Card Display

Securely display the card information in the application. Let your customers pay on the internet without a plastic card.

X-Pays and Merchants Push

Conveniently and securely push the cards into Apple Pay, Google Pay, Fitbit Pay, Click to Pay, and e-commerce merchants from the banking app. Simplify digital card activation from bank apps into all use cases.

Card Alerts & Transaction Controls

Enable cardholders to deactivate lost or stolen cards via bank's application, and to set thresholds and alerts.

PIN Display/Change

Securely display the PIN code in the application and let your customer choose their card's PIN. No need to send or resend a PIN mailer; the PIN is immediately available in the app.

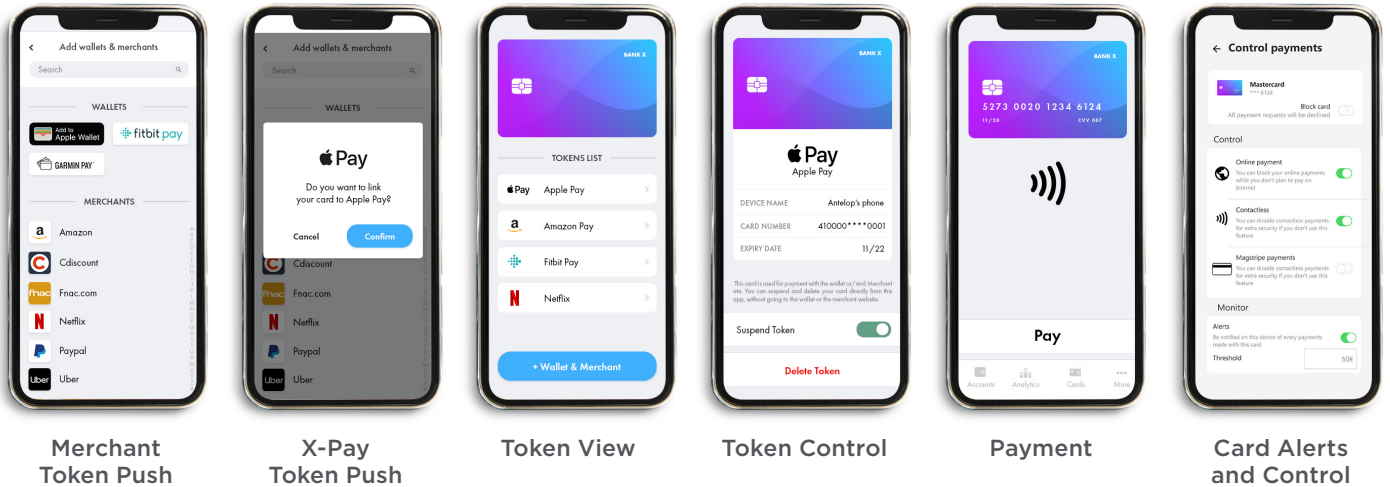

Token Manager

Let the customer self-manage their digital cards. Provide state-of-the-art management service while reducing human support.

Strong Customer Authentication

Use the chip-like security of payment solutions to provide super secure and convenient customer authentication. Helps meet the European PSD2 regulatory compliance with convenient UX.

All digital card features in one single solution

A simplified integration

A single integration for all features

The Entrust SDK covers all features in one single integration. The solution can also be implemented via a web-service based integration.

Built on schemes' services

Relies on the schemes' services for easy integration and maintenance.

With integrated security

The solution provides fully embedded protection of all data flows and assets, offering best-in-class security from end to end.

Mobile-only integration is possible

Core digital card features can potentially be integrated in a mobile application without any backend integration.

All digital card features in your banking application

A unique digital card experience

Provide convenient, instant card services with a unified, digital card experience.

Leading innovation for bank apps

Offer the latest digital card features and innovations directly in your mobile banking application.

Simplified integration

Support all your digital card use cases with a single, secure SDK, or use a web-service based integration for selected features.

A unified service

Trust a mobile-first certified solution and expert provider. No need to assemble multiple heterogeneous components.

Complementary or standalone

Upgrade your existing banking app and card portfolio with our Digital Card Solution. Also build new digital card programs for your customers with all-in-one solution.
